

TREND

PVC building materials are experiencing a growth rate of 20-30% per year, with greater growth rates predicted for the future. The cost savings that Planet Vinyl materials provide, can substantially improve your companies position during fast growth periods. By making Planet Vinyl your vendor of choice you will not only increase your profits but you will enjoy the finest customer support in the industry.

Why our product line has become a big hit in the fence industry...

UNIQUE!
Our patented unique design is not just a regular tongue and groove, but a special channel lock enforces the connection. Our Lego style design saves tons of labor for the end users.

Our hand assembled PVC lattice is a must see item for those who appreciate fine details.

UNIQUE!
Our decorative trim-cap will upgrade your fence

UNIQUE!
Designed to stay together, our patented, locking, tongue and groove system is unique in the industry. This design sells itself, it is quicker and easier to install and stronger than traditional T&G.

Compare:
what other extruders' layout

NEW! Heavy duty bottom rails eliminate the use of metal insertion.

NEW! Triple-ribbed rail

Mono-extrusion
produces materials with a homogenized blending of UV stabilizers, and strengtheners. This gives you profiles that have the same characteristics throughout the entire unit. Giving you quality material not compromise coverage.

Co-extrusion
produces a profile that has a thin cap stock layer with UV protection. This layer is easily damaged, exposing the main layer, that has no UV protection.

This is what we use.

What is the difference?
Just think about *solid gold* and *plated gold*.

Wood Grain Finally, a low maintenance PVC fence, with the deep rich textured look of wood. Just right for the discerning client that won't settle for the usual fare. Compared to single color materials our wood grain panels make a bold new statement.

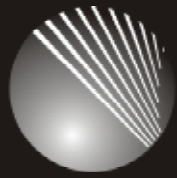

QUALITY Not all vinyl materials are created equal. Superior formulation and structural design makes our materials some of the best in the world. Made of 100% virgin vinyl, UV protected throughout, stabilized for resiliency and durability our material will withstand the harshest weather conditions. Our patented interlocking profiles make for quicker, stronger installations. And of course our material is backed by a limited lifetime warranty.

AFFORDABLE

Efficient manufacturing, volume purchasing of raw materials and favorable labor rates, allow us to produce a superior product at a cost that is good to your bottom line. Compare rates and see why Planet Vinyl is good for you.

planet vinyl
World Class Quality and Value

www.theplanetvinyl.com

Our over sea plant is equipt with the most modern extrusion machinery available, designed and manufactured in Germany and Austria. Utilizing advanced die design, product formulation and production technology, our full product line includes fences, pipes, plates, doors and windows. The annual manufacturing capacity is in excess of 20,000 tons. The products are shipped worldwide, including the United States.
